This is the skeleton/prototype of the main program

On booting up the program you will be greeted and asked to pick one of the option provided

```
Hello
Please select from one of the options below
1) McDonalds
2) Burger King
3) Chipotle
4) Qudoba
|
```

Instead of entering a name the user will have to enter a number that relates to the option they want.

After entering their choice they will be then prompted to order from a menu that is provided to them and only when they are done should they hit "N". Otherwise they should use only the numbers to order the food they want and the quantity they would like.

```
1) Big Mac
2) Fries
3) Drink
4) Meal (includes Fries and a drink)
Enter a choice (Press 'N' to escape)
1
HOW MANY: 14
Enter a choice (Press 'N' to escape)
2
HOW MANY: 1
Enter a choice (Press 'N' to escape)
3
HOW MANY: 11
Enter a choice (Press 'N' to escape)
4
HOW MANY: 12
Enter a choice (Press 'N' to escape)
N
Big Mac: 14
Drink: 11
Fries: 1
Meal: 12
YOUR TOTAL IS:203
```

After making the order the sum is totaled and the program is terminated.
